**Installation, hot-shoe flashes:** The Portrait Dish comes fully assembled and ready to put on.

---

Open the reflector up, and form the hood by pushing the center up with your thumb.

Pull and slip the wide elastic band around the flash. Then center and straighten the reflector..

If you want the elastic band to be tighter or looser, adjust on the backside. The band should be loose enough to slipped on the flash easily, but tight enough to cause the bottom the reflector to bow in, to stabilize the bowl shape of the Portrait Dish.

When folding for packing, fold as below so that the label is on the outside.
